Vibrational (Infrared and Raman) Spectra of Minerals and Related Compounds Nikita V. Chukanov 2019-11-28 The book presents new data on the IR spectra of minerals and on the Raman spectra of more than 2000 mineral species. It also includes examples of IR spectroscopy applications to investigate minerals, and discusses the most important potential applications of Raman spectroscopy in mineralogical research. The book serves as a reference resource and a methodological guide for mineralogists, petrologists and technologists working in the field of inorganic materials.

Extra Bold Ellen Lupton 2021-06-25 Extra Bold is the inclusive, practical, and informative (design) career guide for everyone! Part textbook and part comic book, zine, manifesto, survival guide, and self-help manual, Extra Bold is filled with stories and ideas that don't show up in other career books or design overviews. • Both pragmatic and inquisitive, the book explores power structures in the workplace and how to navigate them. • Interviews showcase people at different stages of their careers. • Biographical sketches explore individuals marginalized by sexism, racism, and ableism. • Practical guides cover everything from starting out, to wage gaps, coming out at work, cover letters, mentoring, and more. A new take on the design canon. • Opens with critical essays that rethink design principles and practices through theories of feminism, anti-racism, inclusion, and nonbinary thinking. • Features interviews, essays, typefaces, and projects from dozens of contributors with a variety of racial and ethnic backgrounds, abilities, gender identities, and positions of economic and social privilege. • Adds new voices to the dominant design canon. Written collaboratively by a diverse team of authors, with original, handcrafted illustrations by Jennifer Tobias that bring warmth, happiness, humor, and narrative depth to the book. Extra Bold is written by Ellen Lupton (Thinking with Type), Farah Kafei, Jennifer Tobias, Josh A. Halstead, Kaleena Sales, Leslie Xia, and Valentina Vergara. **Philippines** Russ Kerr 2000 The Philippines' extraordinary diversity and beauty in one comprehensive guidebook: kaleidoscopic local festivals, bustling cities, deserted islands, awe-inspiring rice terraces, erupting volcanoes, and great adventures under sea and in the hills. -- over 100 easy-to-read maps -- completely revised by a new team of authors -- culturally sensitive and insightful information on the country's political, economic and environmental scene -- essential language chapter, with handy phrases in Pilipino

Managing Radioactive Waste Safely Great Britain. Department for Environment, Food & Rural Affairs 2008 Published as part of the managing radioactive waste safely (MRWS) programme, this white paper sets out the UK Government's framework for managing higher activity radioactive waste in the long-term through geological disposal, coupled with safe and secure interim storage and ongoing research and development to support its optimised implementation. It also invites communities to express an interest in opening up, without commitment, discussions with Government on the possibility of hosting a geological disposal facility at some point in the future. In June 2007 the Government published a MRWS consultation document in conjunction with the devolved administrations for Wales and Northern Ireland. Responses to this consultation have been taken into consideration in the development of this white paper. The paper sets out the framework for the future implementation of geological disposal that includes: the approach to compiling and updating the UK Radioactive Waste Inventory (UKRWI) and using it as a basis for discussion with potential host communities; the Nuclear Decommissioning Authority's technical approach for developing a geological disposal facility, including the use of a staged implementation approach and ongoing research and development to support delivery. The white paper covers the amount of waste for disposal; preparation and planning for geological disposal; protecting people and the environment: regulation, planning and independent scrutiny; site selection using a voluntarism and partnership approach; the site assessment process; timing and next steps.

Popular Science 2002-12 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

The Treasury of Knowledge, Book Six, Parts One and Two Jamgon Kongtru Lodro Taye 2013-01-08 Jamgön Kongtrul's encyclopedic Treasury of Knowledge presents a complete account of the major lines of thought and practice that comprise Tibetan Buddhism. Among the ten books that make up this tour de force, Book Six is by far the longest—concisely summarizing the theoretical fields of knowledge to be studied prior to the cultivation of reflection and discriminative awareness. The first two parts of Book Six, contained in this volume, respectively concern Indo-Tibetan classical learning and Buddhist phenomenology. The former analyzes the traditional subjects of phonology and Sanskrit grammar, logic, fine art, and medicine, along with astrology, poetics, prosody, synonymics, and dramaturgy. The principal non-Buddhist philosophical systems of ancient India are then summarized and contrasted with the hierarchical meditative concentrations and formless absorptions through which the “summit of cyclic existence” can genuinely be attained. Part Two examines the phenomenological structures of Abhidharma—the shared inheritance of all Buddhist traditions—from three distinct perspectives, corresponding to the three successive turnings of the doctrinal wheel.

Medical Technology Assessment Directory Institute of Medicine 1988-02-01 For the first time, a single reference identifies medical technology assessment programs. A valuable guide to the field, this directory contains more than 60 profiles of programs that conduct and report on medical technology assessments. Each profile includes a listing of report citations for that program, and all the reports are indexed under major subject headings. Also included is a cross-listing of technology assessment report citations arranged by type of technology headings, brief descriptions of approximately 70 information sources of potential interest to technology assessors, and addresses and descriptions of 70 organizations with memberships, activities, publications, and other functions relevant to the medical technology assessment community.

The Kerr/Haslam Inquiry [report] Kerr/Haslam Inquiry 2005-07-18 This report sets out the findings and recommendations of the private inquiry into how the NHS dealt with complaints relating to the practice and conduct of two consultant psychiatrists, William Kerr and Michael Haslam, who worked in the same psychiatric hospital in North Yorkshire during the 1970s and 1980s, and who were both later convicted of the indecent assault of female psychiatric patients. The two-volume report examines a range of issues including: i) background events including the range of concerns considered in the provision of mental health services, the conduct of the inquiry and the report in context; ii) detailed examination of the complaints against William Kerr and Michael Haslam, the NHS procedures then in place for raising concerns about healthcare professionals and actions taken in response to concerns; iii) the actions of particular GPs and the response of the GP community at large; iv) contributing factors which acted as a barrier to appropriate investigation and action, including organisational and structural issues, the prevailing medical culture and lack of a governance process, problems of professional practice and individual failings; and v) changes since the 1990s and recommendations for improvements in future practice.

Space Shuttle Missions Summary (NASA/TM-2011-216142) Robert D. Legler 2011-09-01 Full color publication. This document has been produced and updated over a 21-year period. It is intended to be a handy reference document, basically one page per flight, and care has been exercised to make it as error-free as possible. This document is basically "as flown" data and has been compiled from many sources including flight logs, flight rules, flight anomaly logs, mod flight descent summary, post flight analysis of mps propellants, FDRD, FRD, SODB, and the MER shuttle flight data and inflight anomaly list. Orbit distance traveled is taken from the PAO mission statistics.
