Disciple IV Abingdon Press 2005-05 DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study.

Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Achtung-Panzer! Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his

Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Great Maritime Inventions, 1833-1950 Mario Theriault 2001 Great Maritime Inventions 1833-1950 is a delightful look at how innovative Maritime ideas changed the world. Between 1833 and 1950, over 3,300 patents were granted to residents of New Brunswick, Nova Scotia and PEI. From the scuba tank to the variable pitch propeller to two-piece long underwear, Great Maritime Inventions profiles the best of the best. Included are inventions that are considered to be great advances in science, those that have substantially changed the course of development of technology, or those that have enjoyed a lasting success that can still be remembered or observed to this day. All of the inventions described in the book were completely novel in their day. Each patent is first in its classification, or else its claims are so broad that the intellectual property protection it gave covered every possible precursor. Before a patent was granted, an applicant had to declare that their invention was entirely new. Each application then underwent a thorough examination by expert examiners at the patent office. Each of the patents in Great Maritime Inventions were found to represent knowledge newly available to the public, and to be an important step forward in engineering or in developing consumer products that enhance our lives. Not all inventions were spectacular. In fact, many of these inventions never made it into the history books. It is only after fifty years or more that we realize the influence that every one of these inventions has had on our society. Each invention, large or small, was an important link in the chain of evolution of science and useful arts and has improved the way we live today.

Join Dr. Paradis in a stark concrete cell with the indicted as she takes on the daunting task of mapping the suspect’s madness or exposing it as fakery. Take a front-row seat in a tense, packed courtroom, where her testimony can determine an individual’s fate—or if justice will be truly served.
