Cultural Conceptions Valerie Hartouni 1997 Examines the meaning of "life" in an era of emerging biotechnology. What happens to prevailing beliefs about the uniqueness of individual life when life can be cloned? Or to traditional understandings of family relationships when a child can have up to five parents? These are some of the questions addressed by Valerie Hartouni in her consideration of the cultural effects of new reproductive technologies as reflected in video images, popular

journalism, scientific debates, legal briefs, and policy decisions. In *Cultural Conceptions*, Hartouni tracks the circulation and communication of various myths, images, and stories pertaining to new reproductive technologies and their effects, both imagined and real, during the past two decades. While addressing topics ranging from surrogacy and cloning to adoption, ultrasound imaging, and abortion, Hartouni looks to American popular culture for clues to what these new -- and not so new -- reproductive practices tell us about issues of personhood. Hartouni investigates the emergence of new anxieties about the nature of selfhood as well as the recurrence of age-old myths regarding individuality, sexuality, property, and family. She argues that both are being played out in cultural contests over the meaning and organization of women's reproductive capacity. In her discussion of provocative issues such as The Bell Curve controversy and the Baby M. case, Hartouni traces the dialectic of crisis and containment unleashed by reproductive technologies. Ultimately, however, *Cultural Conceptions* argues that the anxieties that surround new reproductive technologies provide openings for alternative understandings and practices of life to emerge and challenge those currently in place. A thoughtful, daring, and original look at this complex set of issues, *Cultural Conceptions* provides an much-needed guide to our nation's psyche as we approach the new millennium.

Without Bounds Yoram Bilu 2000 Without Bounds illuminates the life of the mysterious Rabbi Ya'akov Wazana, a great Jewish healer who worked in the Western High Atlas region in southern Morocco and died there in the early 1950s. Wazana is remembered by Moroccan Jews now living in Israel's urban and rural peripheries. Impressed by his healing powers and shamanic virtuosity, they are intrigued by his lifestyle and contacts with the Muslim and the demonic worlds that dangerously blurred his Jewish identity. Based on interviews with Moroccan Jews conducted in the late 1980s, Without Bounds proposes multiple readings of Wazana's life. Yoram Bilu recreates the influences and important moments in Wazana's life and evaluates his character from psychological and anthropological perspectives. Human and demon-bound, holy and impure, Jew and Muslim, old and young, Rabbi Ya'akov Wazana dissolved the boundaries of the major social categories in Morocco and integrated them into his identity. Without Bounds will fascinate the lay reader interested in mysticism as well as scholars of anthropology, comparative religion, Judaism, and contemporary Jewish and Israeli history.

Real Life Rock Greil Marcus 2015-10-20 For nearly thirty years, Greil Marcus has written a remarkable column called "Real Life Rock Top Ten." It has been a laboratory where he has fearlessly explored and wittily dissected an enormous variety of cultural artifacts, from songs to books to movies to advertisements. Taken together, his musings, reflections, and sallies amount to a subtle and implicit theory of how cultural objects fall through time and circumstance and often deliver

unintended consequences, both in the present and in the future. Real Life Rock reveals the critic in full: direct, erudite, funny, fierce, vivid, uninhibited, and possessing an unerring instinct for art and fraud. The result is an indispensable volume packed with startling arguments and casual brilliance.

From Hopeless and Helpless to Healing Brenda Walker Kirkland 2011-02-17 Our story involves autism and the devastation that its diagnosis brings with it. I don't think we can ever be prepared to hear a doctor tell us that our precious child has something wrong, but when we are told that the medical community does not know what causes the disease and there is absolutely no cure, we find ourselves left with nothing to hold onto. I have never, in my entire life, felt so hopeless and helpless. What were we going to do? How would we overcome this life sentence that our precious little boy had been given? How would we cope with all that lay ahead? Thus began an amazing journey, and through the love of my son and my precious little grandson, I began a faith walk with God that would take me down paths that I never could have imagined. Even today, no one is more surprised that I could overcome so much, so easily and with the joy and peace that fills my life. God has brought me and my family this far, but I believe our story has not ended, it has only just begun.

Good to Great Jim Collins 2011-07-19 The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim

Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

The High School Sex Pot Mrs. R 2005-04-20 Did you ever wonder what your teens wanted to know about sex (without asking)? Do you need a book to jump-start your discussion of sex with your teen? Mrs. R. has been able to generate discussion in her classroom by having her students anonymously submit questions each class period that she would answer. The questions that the students submitted were blunt and honest. She attempted to answer all questions submitted, and tied the answers to the physiology of human sexuality and the maturity needed for responsible decision-making. The frank and innocent questions are contained in the

book, and her candid, informative and sometimes humorous answers are captured in the pages. The High School Sex Pot gives readers the opportunity to get inside the minds of teenagers today. Mrs. R. has compiled sex-related questions that she has anonymously received from teens over the past several years and has answered them scientifically, humorously, and with a frankness that puts adults and teens at ease about today's sexual issues. This book is a must-read for teens, parents, and educators. Everyone is bound to learn something and may come away inspired to more frankly discuss sexuality with those closest to them.

RISING TO MEET OUR TRANSFORMATION William E Leahy 2014 Rising To Meet Our Transformation began as a few thoughts that mushroomed into many ideas that were in my poetic brain flow for quite awhile. Thus I began putting these thoughts into a wide array of poems on paper. Some of these poetic ideas the reader may closely relate to; yet other poetic words may still be more personal and private. As I wrote I allowed the flow of words and ideas to make their impact; then I changed

and rearranged where the order and actual word composition required a better flow. Transformation was the key ingredient of this book and in many instances it will be just that. Nonetheless there are poetic thoughts that relate to a different type of change which may not be totally transforming, but at the same time be identifiable. My hope is that there will be a adequate array of poems that would spark the audience. Transformation requires a radical change in our thinking which translates into our personal life and living. Often we change to survive or become enamoured with a new idea that fills our void' so we change while our surroundings remain somewhat intact. Yet in real time our environment will recreate itself so we will eventually be transformed into a new age so let us begin! Bill Leahy December 2013
