Educart NCERT Science Exemplar Class 10 (With Reduced Syllabus For 2021)

Educart 2020-07-16 NCERT has developed Exemplar Problems in science for Class X with the objective to cover the fundamentals of all Class X topics.

This special edition of Educart Science NCERT Exemplar Book for Class X Science will act as the Bible for students preparing for their dream careers. It is made by my country's top CBSE teachers in collaboration with Educart Experts after a year of rigorous research and development process. This Science Educart Exemplar book is prepared by our country's top experts, to give students a single reference book throughout the year to clear doubts.

Below are the key differentiation of this Educart book:

- Revised with **30% reduced syllabus**.
- Every single question of this Educart NCERT Exemplar is solved keeping the basics in mind.
- Strict NCERT syllabus guidelines are followed when writing explanations.
- Special attention is put to explanations of MCQs and VSA as 25% of paper comes from them.

• Questions that have appeared in previous board examinations are identified, so that students use that extra data to prioritize important questions. • Extra examinable insight in certain solutions is given under the categories of Definition, Differentiation, Concept Applied and Extra Information.

• NCERT recommended Diksha 2.0 platform (launched February 2020) questions (important ones) are solved at the end of each chapter.

Educart NCERT Exemplar Science also serves the purpose of revision, in the last moments before Board examinations, especially, as a major part of paper comes from this book statistically. We sincerely hope that the contents of this book will prove immensely beneficial to all students. **We wish you the best of luck.**

Educational Technology and Pedagogic Encounters Yusef Waghid 2016-07-15 This book looks at some of the underlying theories of educational technology (means), and ways in which this technology is guided in practice (ends). The authors are intent on producing ends that prepare students to undertake new analyses and evaluations that can result in new possibilities for democratic action. Emphasis is on their understanding of and position within educational technology – as opposed to using or applying educational technology. The work is not written from the point of view that their embeddedness within educational technology has a utilitarian end in mind, but rather that their situatedness within educational technology (a practice in itself) leaves open possibilities for new ways of understanding democratic education. This book

is organised into six interrelated themes that work towards the cultivation of educational technology as a human practice which guides pedagogic encounters on the basis of taking

risks in relation to which the unexpected, unimaginable is always possible.
