Writing and Developing Your College Textbook Supplements Mary Ellen Lepionka 2005
Navigating Through Number and Operations in Grades 3-5 Natalie N. Duncan 2007 In grades 3-5, students extend their understanding of place value, larger whole numbers, fractions and decimals. They develop an understanding of multiplication and division, mastering and applying basic facts. Concrete materials can help students represent and reinforce these important concepts. Activities in this book invite students to use fraction circles to compare fractions and dot arrays to explore multiplication and the distributive property. The authors present many other hands-on approaches, including the use of work mats, open number lines, multiplication ""chains"" and games with spinners. Numbers and the operations that we perform with them are the starting points for all mathematics. Accordingly, Principles and Standards for School Mathematics makes the Number and Operations Standard first among the five Content Standards and gives it centrality across the mathematics curriculum from prekindergarten through grade 12. The Navigations Series translates Principles and Standards for School Mathematics into action. Each book includes practical, teacher-tested activities and a supplemental CD-ROM that features applets for students' use and resources for teachers' professional development.

among students. The practical lessons explore the major elements of writing, with explicit strategies for teaching the major forms of writing: Informational writing—detailed descriptions of ways to take and organize notes, use text features, and create reports that have voice; Poetry and personal writing— language choice, imagery, using the senses, and finding the personal pulse of the writer; Narrative—extends writing skills with lessons on story sequence, problem solving, and character development. The lessons form "metacognitive anchors" that build an understanding of the elements of powerful writing. Each lesson comes with an anchor cue card that prompts students to apply their growing understandings independently in writing workshops and in assessing their own writing. In addition, the book provides more than thirty effective tools that are ready to copy and use in the classroom—writing checklists, rubrics for assessment, graphic organizers, note-taking grids, semantic maps, story maps, tips for proofing, and student examples collected from grade 2–7 classrooms.

Daily Guided Writing Carol Simpson 1998-01-01 To motivate students to practice writing every day, this book explains how teachers can guide students to write daily news reports that will then be "published" in the classroom and read by other students. Two other daily writing lessons are also explained: daily journals and "experience stories." All the guided writing activities begin with the teacher modeling the writing process while getting student input for the contents of the writing; gradually, as the weeks go by, students take more and more ownership of the writing, which eventually becomes less formulaic (based at first on reproducible handouts) and more personal and creative. Grades K-2. Illustrated. Good Year Books. 91 pages.

Teaching Writing in a Title I School, K-3 Nancy L. Akhavan 2009 You know the challenges. In your Title I school you have students who are already at risk. Imagine what could happen if you could catch them up, forestall learning issues before they are entrenched, put them on equal footing with their peers. Nancy Akhavan has done it-in school after school. In Teaching Writing in a Title I School she shows you how to craft a rich literacy world where all your students thrive. "The first step you can take is to teach them to write. Really. Teaching children to write well is the key to helping them express themselves. It's also a scaffold to guide their thinking and understanding. It just might solve your teaching problems. You can ensure that all children learn, and you can close the achievement gap." Nancy's guidance is as practical as it is effective. Her carefully crafted planning tools, lessons, and graphic organizers make writing workshop fit seamlessly into your day. Her classroom workshop routines promote student engagement and provide focus. You'll learn how to organize units of study using the lessons from your existing writing program. State standards and meaningful assessment suddenly become manageable. You'll also find effective intervention activities for students who struggle and tips for teaching English learners to write. This book is a must-have resource for teaching to engage all your students, ensure learning, and effectively intervene when students need it. With its companion, Teaching Reading in a Title I School, individual teachers, teachers studying together in professional learning communities, and preservice teachers will find the tools they need to build literacy instruction that guides all their students to high achievement.
