Pencairan Dana Pemerintah pada Sistem Perbendaharaan dan Anggaran Negara Dody Dharma Hutabarat 2021-04-21 Sistem pembayaran, yang merupakan suatu sistem dari rangkaian panjang pengeluaran negara, adalah sistem yang dimiliki Bendahara Umum Negara (BUN) dalam mengeluarkan uang dari rekening pengeluaran untuk keperluan pembayaran kepada yang berhak. Saat ini sistem pembayaran dilakukan dengan metode tunggal yakni melalui penerbitan Surat Perintah Pencairan Dana (SP2D) yang berfungsi sebagai bilyet giro yang menjadi dasar bagi bank untuk mendebit sejumlah dana pada rekening milik BUN dan memindahkannya ke rekening pihak ketiga. Dari rangkaian berbagai aktivitas pada sistem pembayaran, settlement SP2D merupakan akhir dari seluruh rangkaian pada sistem pembayaran. Tepat jumlah, tepat orang dan tepat waktu merupakan tiga elemen dasar yang harus dimiliki oleh sebuah sistem pembayaran. Proses penerbitan dan settlement SP2D sendiri telah mengalami banyak penyempurnaan, seperti percepatan penerbitan SP2D dan penyampaian soft copy SP2D kepada Bank Operasional. Meskipun demikian, masih terdapat beberapa potensi kelemahan yang perlu dicari solusinya. Dua kelemahan yang paling dirasakan adalah tidak dapat dipastikannya kapan aliran dana pencairan SP2D dapat diterima yang berhak serta kemungkinan terjadinya retur transaksi SP2D. Meski penyebab retur telah dapat diidentifikasi, namun sejauh ini belum terdapat upaya yang komprehensif dan tuntas untuk pencegahannya. Selain dua kelemahan tersebut, aktivitas settlement SP2D saat ini masih didominasi dengan proses manual dan terlalu banyak membutuhkan intervensi manusia. Penulisan buku ini ditujukan untuk menghasilkan solusi yang sistematis dan upaya pencegahan atas berbagai permasalahan yang timbul. Penyempurnaan settlement SP2D didasarkan atas penyempurnaan proses bisnis seluruh aktivitas yang terjadi dengan memanfaatkan teknologi informasi yang sudah berlaku umum di dunia perbankan. Untuk mencegah terjadinya retur – sebuah proses yang sangat memakan waktu dan biaya – diusulkan untuk menerapkan metode validasi atas data dan status rekening tujuan pembayaran dengan menggunakan koneksitas dengan penyedia jaringan data perbankan. Untuk tujuan yang sama, perlu dilakukan penyempurnaan atas aplikasi satker berupa database rekening yang menyimpan data rekening pihak ketiga sehingga mengurangi aktivitas entry dan re-entry nomor rekening pada aplikasi satker termasuk pembangunan model aliran dan keamanan informasi data rekening dari satker kepada KPPN hingga diteruskan kepada pihak perbankan. Sejalan dengan penyempurnaan proses bisnis di atas, turut diusulkan untuk membangun relasi langsung antara rekening pengeluaran yang didebit dengan rekening penerima dana,

dengan cara membebankan Rekening Pengeluaran Kuasa BUN Pusat pada bank yang sama dengan bank pada rekening tujuan. Selain untuk mengurangi jumlah jaringan perbankan yang terlibat, juga untuk penyederhanaan jumlah rekening yang dikelola BUN dan sebagai sentralisasi settlement kas melalui Direktorat Pengelolaan Kas Negara. Implementasi berbagai usulan pada buku ini dibagi ke dalam dua periode, yakni sebelum Sistem Perbendaharaan dan Anggaran Negara (SPAN) dan pada saat SPAN dijalankan. Periodesasi implementasi perlu dilakukan karena terdapat dua sistem yang berbeda pada dua kurun waktu yang berbeda pula. Selain untuk mendapatkan pengalaman dari setiap aktivitas baru, periodesasi tersebut juga untuk memberikan jaminan bahwa seluruh usulan penyempurnaan dapat diimplementasikan dengan baik.

Customer Data Integration Jill Dyché 2011-01-31 "Customers are the heart of any business. But we can't succeed if we develop only one talk addressed to the 'average customer.' Instead we must know each customer and build our individual engagements with that knowledge. If Customer Relationship Management (CRM) is going to work, it calls for skills in Customer Data Integration (CDI). This is the best book that I have seen on the subject. Jill Dyché is to be complimented for her thoroughness in interviewing executives and presenting CDI." -Philip Kotler, S. C. Johnson Distinguished Professor of International Marketing Kellogg School of Management, Northwestern University "In this world of killer competition, hanging on to existing customers is critical to survival. Jill Dyché's new book makes that job a lot easier than it has been." -Jack Trout, author, Differentiate or Die "Jill and Evan have not only written the definitive work on Customer Data Integration, they've made the business case for it. This book offers sound advice to business people in search of innovative ways to bring data together about customers-their most important asset-while at the same time giving IT some practical tips for implementing CDI and MDM the right way." -Wayne Eckerson, The Data Warehousing Institute author of Performance Dashboards: Measuring, Monitoring, and Managing Your Business Whatever business you're in, you're ultimately in the customer business. No matter what your product, customers pay the bills. But the strategic importance of customer relationships hasn't brought companies much closer to a single, authoritative view of their customers. Written from both business and technicalperspectives, Customer Data Integration shows companies how to deliver an accurate, holistic, and long-term understanding of their customers through CDI.

Oracle Financials Cloud J. Hall 2016-07-08 Oracle Financials Cloud: Payables Essentials These questions are similar to the ones asked in the actual Test. How should I know? I know, because although I have been working as a Oracle Financials/Cloud Consultant for many years, I have myself recently certified with the latest version of the Certification test. Before you start here are some Key features of the Certification Exam. This certification exam verifies that the candidate has the knowledge required in the area of Oracle Financials Cloud: Payables Essentials This certificate builds on basic consultant skills and experience that is then refined by practical experience during several projects. Candidates must also demonstrate understanding of Implementation Projects, Configuration Packages, Invoice Validation, Payments, Expenses, Reporting and Withholding Tax, among others. The exam is Computer based and you have 120 minutes to answer 73 Questions. The Questions are (mostly) multiple choice type and there is NO penalty for an incorrect answer. Some of the Questions have more than one correct answer. You must get ALL the options correct for you to be awarded points. For questions with a single answer, the answers will have a button next to them. You will be able to select only one button. For questions with multiple answers, the answers will have a 'tick box' next to them. This allows you to select multiple answers. You are not allowed to use any reference materials during the certification test (no access to online documentation or to any Oracle system). Clearing the Certification will not automatically lead you to a job. However a Certification with some project experience will certainly open a lot of doors for you. So if you have little or no experience, you should get yourself certified, get some project experience, and then the whole of the Oracle World open for you to explore. Helping you with the first step on you ladder to success is this book!
