100+ Horror Collection. Scary Stories to Read in Bed

Tonight. Illustrated Edgar Allan Poe 2022-01-25 The oldest and strongest emotion of mankind is fear, and the oldest and strongest kind of fear is fear of the unknown. These facts few psychologists will dispute, and their admitted truth must establish for all time the genuineness and dignity of the weirdly horrible tale as a literary form... As may naturally be expected of a form so closely connected with primal emotion, the horror-tale is as old as human thought and speech themselves. H. P. Lovecraft Horror intends to create an eerie and frightening atmosphere for the reader. Prevalent elements include ghosts, demons, vampires, werewolves, ghouls, the Devil, witches, monsters, dystopian and apocalyptic worlds, serial killers, cannibalism, psychopaths, cults, dark magic, Satanism, the macabre, gore, and torture. Edgar Allan Poe The Murders in the Rue Morgue The Gold Bug The Black Cat The Pit and the Pendulum The Tell-Tale Heart The Fall of the House of Usher The Masque of the Red Death The Cask of Amontillado The Facts in the Case of M. The Illustrated History of Triumph Sports and Racing Cars

G. William Krause 2017-11-15 The Triumph Motor Company is known around the world for its iconic sports cars. The hugely popular TR series, Spitfires, and GT-6s represent the quintessential British sports car; rugged good looks were combined with performance and economy at a price everyone could afford. These sports cars are always in demand and prized by British car collectors, racers, and open-air motoring enthusiasts. Triumph understood the connection between competition success and sales success and was able to parlay rally and road racing wins into the best-selling sports cars in the world, particularly in the United States during the 1950s and 1960s. The Works competition cars notched victories at Le Mans, Sebring, the Monte Carlo rally, and many others and inspired privateers to take their cars to the track. Every model came from a bloodline of racing. Triumph historian G. William Krause reviews every model in the sports car lineup. He covers the history, design evolution, and performance specifications from the first sports cars in the 1930s through the final cars built in 1981. Throughout Triumph's history a number of pivotal moments could have significantly changed the company's fortunes. This book also looks at the "what if" cars that never made it into production, including photos. Although they have not been built for more than three decades, their mark on sports car history is undeniable. Whether you're a fan of the spartan brutes of the 1950s or the refined comfort and performance of the last TRs, you will find the backstory of your favorites here. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

Ubiquitous Display Environments Antonio Krüger 2012-06-12 Our increasingly smart environments will sense, track and model users and provide them with personalized services. We can already embed computers in everyday objects such as shirt buttons and pencils; objects of all sizes, from wristwatches to billboards, will soon incorporate high-quality flexible displays; we have improved access to wireless Internet communication; and we are now transitioning from traditional linear to targeted interactive media. The convergence of these factors -- miniaturization, display technologies, wireless communication, and interactive media -- will allow us to leave our desktop computers and move to a radical computing paradigm, the ubiquitous display environment, where media and visual content

will support a rich variety of display devices that enable users to interact with information artifacts in a seamless manner. This is one of the most exciting and important areas of technology development and this book addresses the challenge within the context of an educational and cultural experience. This is inherently a multidisciplinary field and the contributions span the related research aspects, including system architecture and communications issues, and intelligent user interface aspects such as aesthetics and privacy. On the scientific side, the authors integrate artificial intelligence, user modeling, temporal and spatial reasoning, intelligent user interfaces, and user-centric design methodologies in their work, while on the technological side they integrate mobile and wireless networking infrastructures, interfaces, group displays, and context-driven adaptive presentations. This book is of value to researchers and practitioners working on all aspects of ubiquitous display environments, and we hope it leads to innovations in human education, cultural heritage appreciation, and scientific development.
